

We protect organizations from financial and reputational losses with smarter cybersecurity.

//Who we are

Thinking “it won’t happen to us” is one of the biggest mistakes a business can make regarding cybersecurity.

Through best-in-class systematic reviews and analysis, we calibrate your defenses for effective security, allowing you to grow and innovate unhindered by cyberthreats.

Conglomerates & Corporations

Financial Services

Retail

Industrial

How can we work together?

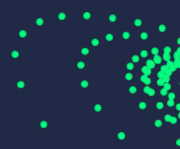

We work alongside teams either as their full security team – managing people, processes and technologies – or as an advisor along the way.

People, processes, and technologies

Co-managed
Security Advisor

Managed
CISO Support Service

Fully Managed
Security-as-a-Service

Why Metabase Q?

// We build a stronger base for your future

- ✓ Continuous auditing and analysis of your infrastructure and technology configuration to detect blind spots, vulnerabilities and right-size your cybersecurity needs and spending
- ✓ Tech-agnostic team, partnerships, and integration to manage ROI and reduce legacy overhead
- ✓ Internationally recognized in-house research and innovation
- ✓ We go beyond checking the box for compliance to security that protects your future

10 of the largest companies in Latin America, government agencies and more than 80% of financial transactions in Mexico rely on Metabase Q to protect their systems and data from cyber-attacks.

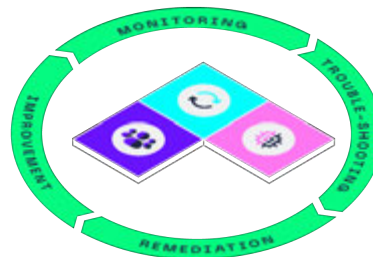

How we do it:

// People, Process, and Technologies

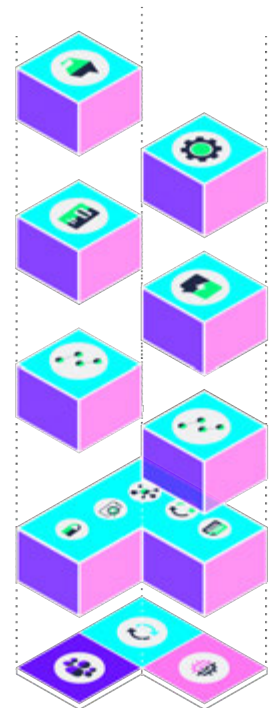

Start with an assessment to understand the state of your security

Establish a strong base for your security in a custom roadmap **across people, processes, and technologies** to ensure visibility, control, consolidation, and integration

Add on trainings, compliance, application security, incident response and other industry-specific roadmaps (IoT, Industrial, ATMs, PoS)

When your security works, your future works
Build a better future with Metabase Q
